

OST: LEADING THE WAY IN CUSTOM APP DEV

CUSTOM APPLICATION DEVELOPMENT

You've got an idea, or at least a need for some technological help. And we've got the geeks to make it happen. OST has over forty senior-level developers with hundreds of combined years of experience to help you take your ideas from concept to reality. Whether you need a mobile app, critical business software, or a custom web application, you'll get the most from OST. From a local farm's apple sorting process to building one of the world's largest ecommerce sites, we've done it all and are ready to bring our technical expertise to your next project. To chat about your idea call 616.574.3500 or email info@ostusa.com. Visit ostusa.com to learn more.

Business Strategy & Architectural Consulting

We have a profound technical understanding of how to solve complicated business problems with elegant solutions. Our goal is to help our clients take advantage of technology to improve their business and bottom line.

Web/Mobile/Desktop Development

With OST's deep understanding of how to solve business challenges with the right application, no opportunity is too big or small.

Systems Integration

We have extensive experience dovetailing new technology platforms with our customers' existing systems.

Customized Reporting Solutions

Yes, we understand the business reasons behind our clients' reporting needs. Better yet, we understand how to make it all happen.
