Edition 2

“HACKING GROUP ANONYMOUS IS PLANNING ON TARGETING AUSTRALIAN BANKS AFTER ALREADY BREACHING A SYDNEY COUNCIL”

“BIG BANKS COMPROMISE SECURITY WITH CONVENIENCE”

“EMC’S RSA SECURITY BREACH MAY COST BANK CUSTOMERS \$100 MILLION”

Ripped from today’s headlines. It’s easy to become numb to the sheer volume of stories. Another data breach, resulting in the loss of customer information.

But don’t think that just because it’s happening all over, the penalties aren’t being enforced. Banking institutions that expose customer information either willfully or accidentally are facing stiff fines and penalties. Not to mention the damage to a company’s reputation. In these tough economic times, can your bank afford the damage to its reputation?

Our approach is simple: we try to access data that we should not be able to access. We’ll examine your systems every which way, trying to access data on your network that we shouldn’t be able to get to – with your permission, of course!

We’ll do all of this without taking up a lot of your time, or the time of your staff. And when we do get to your data, we’ll give you specific, concrete recommendations on how to mitigate the risk. Oh, and we’ll give you information that will help you to prepare for your next visit from the auditors. Because the better prepared you are for their visit, the more likely they are to finish up their reports so you can get back to business.

And keep your name out of the headlines.

Give us a call to learn more about how we can help you. We love this stuff!

MONEY BACK GUARANTEE

If this isn’t the BEST assessment experience you’ve ever had, we’ll refund your money back 100%.

DON’T JUST TAKE OUR WORD...

The professionalism and knowledge of the team complimented by the thoroughness of the security audit and the detail of the security reports has enabled us to make the appropriate strategic and tactical investments to our security infrastructure that not only reduces our risk to exposure, but also enhances the level of customer service we provide. Our expectations have been met with each audit and we highly recommend OST’s security service to any business.

Daryl C.
Director of Information Systems

ABOUT OST

OST (Open Systems Technologies) is an employee-owned, \$55 million company specializing in Banking IT Security.
