BAAN TIP OF THE MONTH:

Do you need to know that field name to be able to write your query? In Baan IV, just zoom to the help for the field in the session (click on the arrow/question mark in the toolbar, then click on the field, or, when you're in the field, press [F1]). The field name will be in the title bar of the help that comes up. In ERP LN, activate the help the same way. When the help comes up, hover your cursor over the field description; the field name should show up as a tool tip!

DON'T JUST TAKE OUR WORD...

"The technical expertise and consulting from OST regarding such matters as LN, Oracle and UNIX is second to none. Not only that, but new technology adoptions are made so much easier with OST's help and guidance paving the road."

Ken Jensen, Director of IT
Nilfisk-Advance
