Over the years OST have supported over 400 Baan/ERP LN customers around the world – see the map below – with education and technical implementation services. We provide a complete spectrum of Baan services:

- ERP LN upgrades
- Implementation services
- Application development
- Remote managed services
- Co-location services
- Database performance tuning
- System optimization
- High availability services
- Disaster recovery

## DON'T CALL IT A COMEBACK BAAN / LN USERS GROUP

Do you want to be a part of reshaping the Baan/LN User Group community? Stay tuned for more information or feel free to contact David Gerrity at [dgerrity@ostusa.com](mailto:dgerrity@ostusa.com) to inquire about how you can get involved today!

## ABOUT OST

**OST (Open Systems Technologies)** is an employee-owned, \$55 million company. Over the past 15 years OST has supported more than 400 Baan/ERP LN customers around the world with education and technical implementation services. Since 2003, the company has logged close to 40% compounded growth in revenue and in its number of employees. In 2007, 2008, 2009 and 2010, OST was recognized in *INC. magazine's 5,000's Fastest Growing Private Companies*. OST was also listed on *CRN's FastGrowth100* in 2007, 2008 and 2009, and on the *Michigan 50 Companies to Watch* in 2009.

## DON'T JUST TAKE OUR WORD...

We covered a lot of ground. We now have a base configuration of the company loaded on our test server that we can now play with. This was done with few man hours of our time – not the typical experience we've had. I can assure you that OST's approach is exactly what we are looking for from a partner organization. Overall I'm happy with how this project worked out. We are excited to move forward with implementing LN. You folks have taken a lot of stress off of us while helping us move forward and I can certainly see opportunity for us to work together in the future.

Roger Brooks, Information Systems,  
DALSA Corporation

## BAAN TIP OF THE MONTH:

Did you ever want to know everything about the session you're in? Pressing [CTRL] + [SHIFT] + 7 within a session provides the XML schema for that session including current package combination, session main table, session fields, field domains, and form commands.
