

OST Hosts Demystifying the Virtual Desktop Seminar on October 3, 2008.

This is your chance to go beyond the basics on one of the hottest topics in IT—Desktop Virtualization. You may have heard the terms: Virtual Client, Hosted Desktop, Virtual Desktop, Virtual Desktop Infrastructure, Blade PC's, VDI, CCI, or Client Virtualization.

Please join us on Friday, October 3 to learn which of these terms are similar and which are different, advantages and disadvantages of virtualizing the desktop, and which technology will work best for your environment. You will also have the opportunity to see demonstrations and ask the hard questions about how these technologies will work in the one environment that matters—yours.

Friday, October 3, 2008

9:00 a.m. - 1:30 p.m.

Lunch will be provided

Brassworks Building

648 Monroe N.W., Suite 101

Grand Rapids, MI 49503
